

IDENTITYFORCE MOBILE

Anywhere, Anytime Access Includes ID Theft Protection + Mobile Cybersecurity

QUICK FACTS

Includes Mobile Attack Control™, which monitors and alerts IdentityForce mobile app users to a wide array of threats including **rogue apps, spyware, unsecured Wi-Fi connections, and even recognizes fake or “spoof” networks.** You also get access to a Virtual Private Network (VPN), that provides a secure internet connection anywhere you go. It encrypts the data being transmitted or received over your phone's Wi-Fi connection so hackers and thieves cannot see your information.

Rapid access to identity restoration experts ready to help.

Features Facial Recognition and Touch ID for increased identity security.

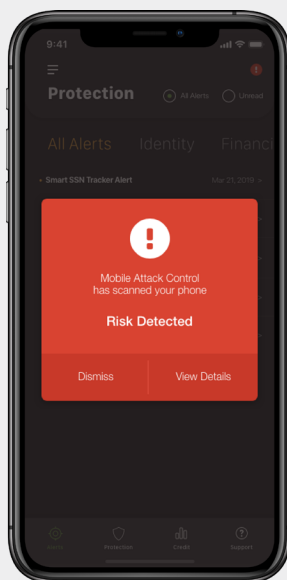

Intuitive navigation with a zero-tolerance policy for advertising or promotional materials.

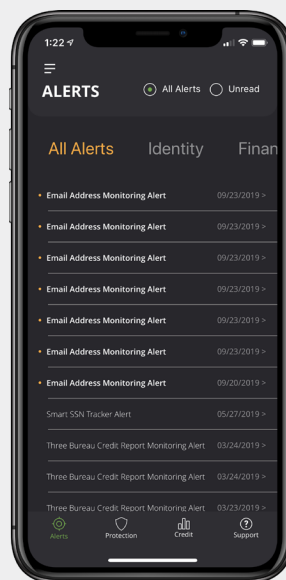

At IdentityForce, a Sontiq brand, we're committed to Protecting What Matters Most for all people — anytime, anywhere. In today's digitalized world, your personal data is everywhere — home, work, school, doctor's office, and online. With **IdentityForce Mobile**, our members can instantly access all their identity protection information with just a few taps on their smartphones, along with added mobile cybersecurity features.

After more than 40 years in business, we're proud of the legacy we continue to build by providing our members with world-class technology combined with 5-star personalized support. It's why we have a 95% customer satisfaction rating, 98% member retention, and 100% restoration success.

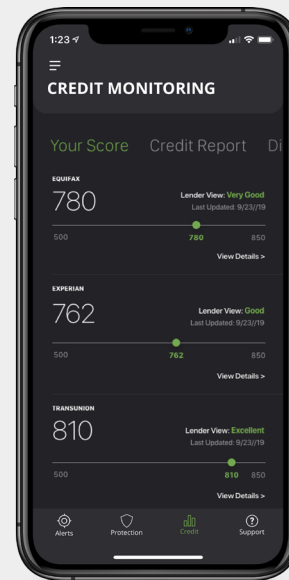

We're not just Identity Protection, we are *YOUR* Identity Protection partner.

With Mobile Attack Control's™ scan, IdentityForce members will be alerted to a wide array of mobile threats to protect against mobile hacks and threats.

Stay informed by viewing alerts and notifications instantly with one touch details.

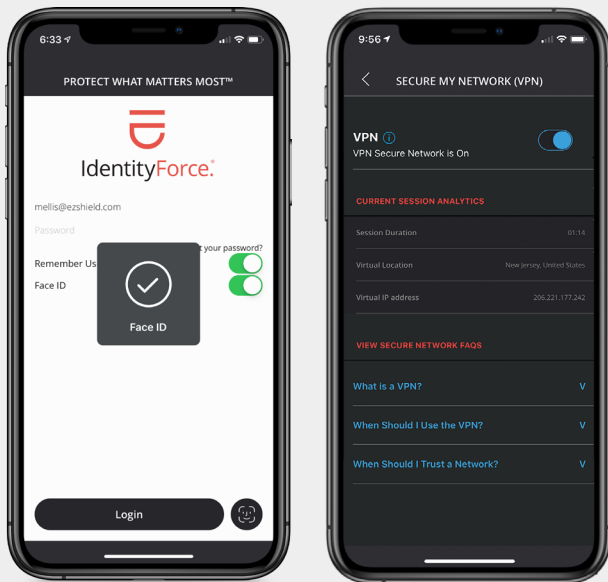

IdentityForce members with accounts that include credit monitoring have immediate access to credit scores and tips to help understand the ratings.

WE MAKE IDENTITY PROTECTION...EASY

With IdentityForce Mobile, members can take their Identity Theft Protection anywhere — whether they are traveling overseas, away on vacation, or just don't want to be tethered to their desktop computer.

Once the mobile app is downloaded from either the [App Store](#) or [Google Play](#), it takes just three steps to gain full account access. It's as easy as entering your User ID and Password and then tapping the "Login" button.

Upon entering Login information, IdentityForce members can opt to Remember User ID within the mobile app and activate either facial recognition or Touch ID depending on phone model.

With Secure My Network (VPN), members can secure their network whenever they're connected to public Wi-Fi or an unsecure network.

SECURITY MATTERS

Our top priority is your security, and through IdentityForce Mobile we use Two Factor Authentication (2FA), facial recognition, and Touch ID.

2FA | Although it sounds technical, two-step verification — also called two-factor authentication, or 2FA — is very simple. Instead of the usual Login involving only a User ID and Password, members will receive a second form of authentication — a verification code — delivered by email, text, or phone.

Facial Recognition | Ability to identify or verify a member by mapping facial features, characteristics, and dimensions in order to grant access. Available based on phone model settings.

Touch ID | Faster and more secure than a 4-digit passcode, Touch ID is a fingerprint sensor and is becoming the de facto standard for proof of identity.

VPN Security | With Secure My Network (VPN), IdentityForce Mobile ensures that members have a secure internet connection anywhere. It encrypts the data being transmitted or received through the phone so hackers can't see sensitive personal information.

MONITOR

Continuous monitoring to keep credit history and personal information secure.

ALERT

Early warning system to take action before the damage is done.

PROTECT

Rapidly creates a force field of protection around your mobile device, financial accounts, credit cards, and personal information.

RECOVER

Award-winning, fully-managed recovery services and \$1 million identity theft insurance coverage.

GET STARTED!

It's easy to get started. Members can download the free IdentityForce Mobile App at either the iTunes store for iOS or the Google Play store for Android.
