

**Download now. Install later.**

Your link expires in **72 hours or sooner**.

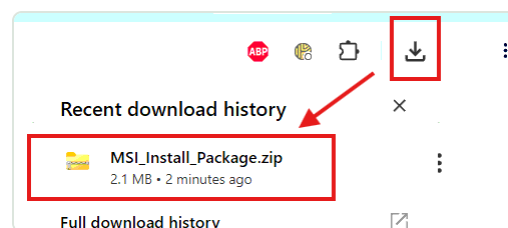

## 1 Download

Click the download link we sent you.  
Save the file if asked.

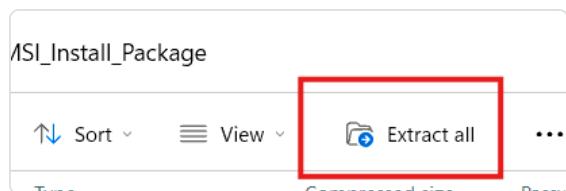

## 2 Find the file

Click the **download arrow** at the top of your browser.  
Click **MSI\_Install\_Package.zip**.

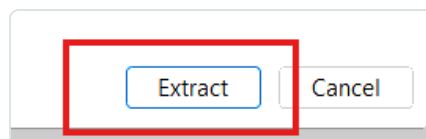

## 3 Open the package

Click **Extract all**.

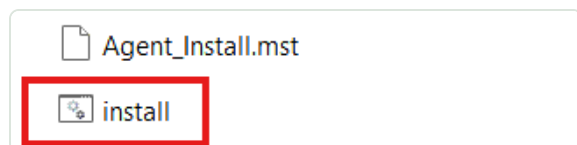

Then click **Extract**.

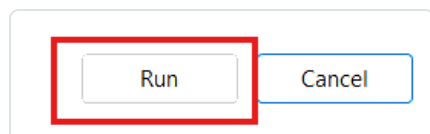

The new folder opens.

## 4 Install

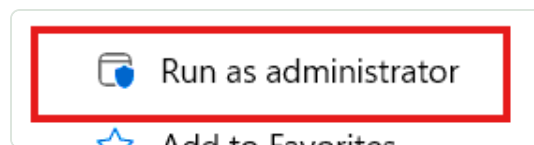

Find **install** in the new folder.  
It may be named **install.bat**.

Click **Run** if asked.

Click it with your **right mouse button**.  
Choose **Run as administrator**.

Then click **Yes** if asked.

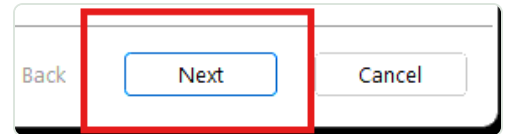

Only run the file from the EasyITGuys link we sent you.

## 4 Install, continued

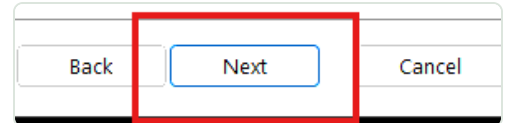

The **ConnectWise Automate** setup window will open.

Click **Next**.

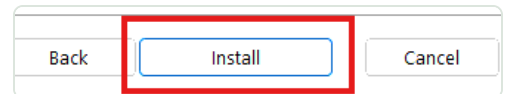

**Do not change the settings.**

Click **Next** again.

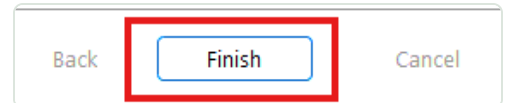

Click **Install**.

Wait until it finishes.

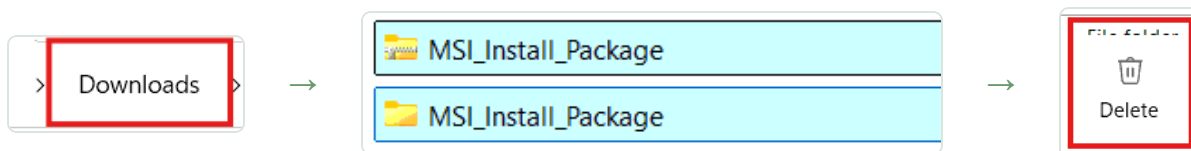

Click **Finish**.

## 5 Clean up

Go back to **Downloads**. Delete both items shown below.

Right-click each one, then click **Delete**.

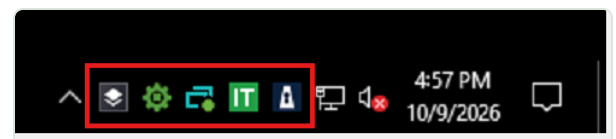

## 6 Check for the green gear

Look near the Windows clock.

Click the **small arrow** to see hidden icons.

Find the **green gear**.

Additional security software installs automatically over the next **24 hours**.

As setup finishes, you may see these icons from our current minimum setup. The last icon in the red box is **for business clients only**. Extra security layers may add more icons.

### Need help?

Stuck, asked for a password, or no green gear?

Use your **IT Support Panel** or contact your **support team**.

We can install it for you. If you do not have support coverage, support costs will apply.
